SmartSpend: Comprehensive Comparative Research

Financial Health Score Systems · AI/LLM Architecture · Global & Philippine Competitor Landscape

Prepared for: Pre-Final Defense — Adviser Presentation
Research date: September 21, 2026 *(all competitor statuses verified as of this date)*
Group: Lucid Frame | Lorma Colleges CCSE BSIT 2026–2027, 1st Semester
Authors: Brix A. Directo · Cyrille John M. Rubis · Djaunathan Albert S. Madayag
App version: SmartSpend v2.9.49

Evidence note: Product features, pricing, and availability change frequently. All competitor entries are based on public app-store listings, official product pages, and published reviews as of September 21, 2026. SmartSpend feature statuses are PROJECT-REPORTED from code audit. Where a feature was not found in public review, it is marked "not found in public review (Sep 21, 2026)" rather than "does not exist."

PART 1 — AI & LLM LANDSCAPE

1.1 General-Purpose LLMs: Current State (September 2026)

The dominant pattern in 2026 is that frontier general-purpose models (Gemini, GPT, Claude) are outperforming domain-specific financial LLMs on most practical tasks, because their breadth, multilingual capability, tool-calling, and context windows have surpassed what specialized models offer. Domain-specific models remain relevant only for institutional tasks (SEC filings, trading signals, risk analysis) — not for consumer personal finance.

Provider	Model family (current)	Context	Key strength	Relevant to SmartSpend?
Google	Gemini 3.5 Flash-Lite	1M tokens	Fast, cheap, agentic, free tier	✅ Primary model in use
Google	Gemini 3.5 Flash	1M tokens	Strong agentic/tool-use (83.6% MCP Atlas), Finance Agent v2 +14.9pts	✅ Fallback 2 in use
Google	Gemini 3.7 Flash	1M tokens	Paid only ($0.75/1M input) — frontier capability	❌ Cost
OpenAI	GPT-5.6 / GPT-6 Astra	256K	Best ecosystem breadth, coding, reasoning	❌ Paid, no free tier

OpenAI	GPT-OSS 120B / 20B	131K	Open-weight, via Groq (free)	✅ Fallbacks 3, 6 in use
Anthropic	Claude Fable 5 / Opus 4.8	200K	Best for long-document analysis, 10-K reading	❌ Paid
Alibaba	Qwen3.6 27B / Qwen3.8 27B	262K	Strong multilingual, Apache 2.0, via Groq free	✅ Fallbacks 4, 5 in use
Moonshot AI	Kimi K3	1M	#1 open-weight model (Artificial Analysis), 2.8T MoE	❌ No permanent free API
DeepSeek	V4 Flash / Pro	163K	Cheapest frontier ($0.14/MTok)	❌ No free daily quota
Mistral	Large / Small / Codestral	128K	EU-compliant, free experiment tier	❌ Not in current chain

SmartSpend's 8-provider failover chain (v2.9.49):

Priority	Provider	Model ID	Free Daily Limit
1	Google AI Studio	`gemini-3.5-flash-lite`	~500 req/day
2	Google AI Studio	`gemini-3.5-flash`	~250 req/day
3	Groq LPU	`openai/gpt-oss-120b`	1,000 req/day

4	Groq LPU	`qwen/qwen3.6-27b`	1,000 req/day
5	Groq LPU	`qwen/qwen3.8-27b`	1,000 req/day
6	Groq LPU	`openai/gpt-oss-20b`	1,000 req/day
7	Groq LPU	`groq/compound-mini`	250 req/day
8	Cerebras WSE	`openai/gpt-oss-120b`	1M tokens/day

⚠️ Retired: `gemini-3.1-flash-lite` (returns 404, Sep 2026), `llama-4-scout`, `llama-3.3-70b`, `llama-3.1-8b` (all retired from Groq free/dev tier Feb–Aug 2026).

1.2 Why Gemini 3.5 Flash-Lite as Primary

Gemini 3.5 Flash-Lite was selected through a structured benchmarking study using 100 localized Taglish expense-parsing prompts. Key rationale:

- GA stable since July 21, 2026 — migrated from 3.1 which returned 404s in production (Sep 9, 2026)
- 1M token context window — SmartSpend's per-user context (50 expenses + budgets + goals) = ~1,000–5,000 tokens, fitting in 0.5% of the window
- 6× cheaper than Gemini 3.5 Flash; best cost-performance ratio for the short, well-specified expense-parsing tasks that dominate SmartSpend's AI usage
- Native function calling — required for SmartSpend's 34 agentic action dispatch
- Filipino-English multilingual — tested on Taglish phrases (e.g., "nagbayad ako ng 120 pesos para sa pansit at coke sa Jollibee kanina")
- Free tier: ~500 req/day — sufficient for academic deployment

Why context injection over RAG: Per-user data fits entirely in one prompt. RAG adds vector-search latency and fails on multi-hop queries like "Can I afford this given my GCash balance, clothing budget, and savings goal?" — which requires all data points simultaneously in context.

1.3 Financial-Domain LLMs vs General-Purpose: The Key Distinction

Critical finding for the manuscript: Financial-domain LLMs are NOT better for SmartSpend's use case.

LLM	Type	Primary use	Relevant to SmartSpend?	Why not
BloombergGPT (Bloomberg, 50B params)	Institutional	Market news, SEC filings, sentiment analysis, trading	❌ Not relevant	Institutional finance ≠ consumer budgeting; proprietary, no public API
FinGPT (AI4Finance Foundation, open-source)	Research	Financial sentiment, news analysis, trading signals	❌ Not relevant	Built for institutional trading research, not Taglish budgeting
FinLlama / finance-tuned variants	Research	Financial document classification, QA on financial texts	❌ Not relevant	Not tested for Philippine context, Taglish, or agentic actions

Gemini 3.5 Flash-Lite (Google, general-purpose)	General + Finance	Taglish parsing, agentic actions, multi-modal	✅ In use	Outperforms domain-specific models on well-structured task-based prompts
GPT-OSS 120B (OpenAI open-weight, via Groq)	General	Reasoning, fallback	✅ In use	Strong general reasoning, free via Groq

Key academic point for manuscript Chapter 3:

"Financial-domain LLMs such as BloombergGPT and FinGPT are optimized for institutional tasks — sentiment analysis of SEC filings, market news, and trading signals. They are not designed for, nor tested on, Philippine household budgeting, Taglish conversational input, or agentic financial management. SmartSpend uses frontier general-purpose models because their multilingual capability, instruction-following, and tool-calling performance surpasses what domain-specific financial LLMs offer for consumer personal finance applications."

PART 2 — FINANCIAL HEALTH SCORE COMPARATIVE ANALYSIS

2.1 Existing FHS Systems Compared

System	Publisher	Scale	Input Type	Transparency	Philippine Relevance

Financial Health Network FinHealth Score	FHN (US)	0–100	8 survey indicators	Partially disclosed	Academic foundation — four-pillar structure
CFPB Financial Well-Being Scale	CFPB (US)	0–100	10-question survey	Standardized scoring table	Same scale concept; measures psychological states
MindsBudget	MindsBudget (web)	0–100	Uploaded bank statements	Component structure disclosed	Closest transaction-based model globally
Wingman Money	Wingman (AU)	0–100	Linked bank accounts	Not publicly disclosed	Closest commercial behavioral FHS — not available PH
BudgetPH / KindlyF	KindlyF (PH)	0–850	User-entered data	Not publicly disclosed	Only direct PH competitor with behavioral score
Alkansya AI	Alkansya (PH)	0–100 (claimed)	Transactions	Not publicly disclosed	Philippine competitor with

					claimed FHS
Artha Engine	Artha (India)	0–100	Income, debt, savings, investments	Weighted formula disclosed	Broader, investment-oriented
SmartSpend (Full Mode)	Lucid Frame (PH)	0–100	Recorded transactions + income	Fully disclosed	Offline, dual-mode, Filipino context
SmartSpend (Lightweight Mode)	Lucid Frame (PH)	0–100	Spending behavior only	Fully disclosed	For students, irregular-income users

---

2.2 SmartSpend FHS Formula — Current (v2.9.49, updated from v2.9.42)

Full Mode — 4 components × 25 pts = 100 max

C_1 — Savings Rate: $C1=25\times\min!(1,\ Income-SpentIncome\times0.20)$ Full 25 pts when saving ≥ 20% of income. *Basis: Warren & Tyagi (2005) 50/30/20 rule.*

C_2 — Overspend Control *(v2.9.39 update — one-off purchase nuance):* $C2=25\times(1-hardOverDays+softOverDays\times0.5activeDays)$

- hardOverDays = scattered multi-item overspend (full penalty)
- softOverDays = single large planned purchase caused overspend (0.5× reduced penalty)

C_3 — Budget Adherence *(v2.9.42 update — essential category exemption):* C3=25×on-track discretionary categoriestotal discretionary budgets Bills, Health, and Education excluded from penalty — essential costs don't unfairly reduce score.

C_4 — Logging Consistency: C4=25×min!(1, loggedDaysactiveDays) Current month only; grace period for mid-month starters.

Lightweight Mode (for students/informal workers)

Component	Measures	Key formula element
Spending Restraint	vs spending limit	Full pts at ≤80% of limit
Logging Consistency	Same as Full Mode	loggedDays / activeDays
Category Balance	No single category > 40%	Penalty when top category > 40%
Habit Streak	Consecutive logged days	Full pts at 14-day streak

Behavioral Adjustments *(v2.9.42: discretionary-only)*

Adjustment	Trigger	Formula
Warning Decay	Budget exceeded + spending continues (discretionary only)	-5 pts/day, max -15
Gap Penalty	Unlogged days + user confirmed spending occurred	-3 pts/day, max -15

Gap Bonus	Unlogged days + user confirmed no-spend	+2 pts/day, max +10

Score labels (from code): 90+ = Excellent 👑 · 80–89 = Great 🏆 · 70–79 = Good ⭐ · 60–69 = Fair 🌱 · <60 = Needs Work 📉

Theoretical framework

SmartSpend's FHS is a Prototype Observed Financial Health Indicator (FHI) per:

- CBA-MI (2018) dual-scale model — distinguishes Observed (transaction-derived) from Reported (survey-based)
- UNSGSA (2021) guidelines for FHI design
- FHN (2018) four-pillar conceptual framework

It is NOT validated by the CFPB scale (which measures psychological well-being states, not behavioral transaction outcomes).

2.3 Summary Comparison Table

Dimension	SmartSpend	MindsBudget	Wingman	BudgetPH	Alkansya AI	FinHealth Score
Transaction-based (no survey)	✅	✅	✅	✅	✅	❌ survey
Fully disclosed formula	✅	Partial	❌	❌	❌	Partial

Offline computation	✅	✅	❌	✅	❌	N/A
No bank API	✅	✅	❌	✅	Unknown	N/A
Dual-mode (regular + irregular income)	✅	❌	❌	❌	❌	❌
Philippine / Filipino context	✅	❌	❌	✅	✅	❌
Essential category exemption	✅ v2.9.42	Unknown	Unknown	Unknown	Unknown	❌
Mobile-first, free	✅	❌ web	❌ paid	✅	✅	N/A

PART 3 — GLOBAL APP COMPETITOR ANALYSIS

3.1 Tier 1 — Direct AI Financial Management Competitors

ChatGPT Personal Finance (OpenAI)

- Launched: May 15, 2026
- Platform: iOS/Android (US only, ChatGPT Pro subscribers)
- How it works: Links bank/credit card/brokerage accounts via Plaid (12,000+ institutions); GPT-5.5 answers spending questions grounded in real account data; shows spending dashboard, flags subscriptions, tracks bills
- SmartSpend comparison: ChatGPT Finance is US-only via Plaid — no Philippine bank support. Requires paid ChatGPT Pro subscription. SmartSpend works offline, free, with Filipino-specific banks and e-wallets.

Cleo 3.0 + Autopilot (US/UK)

- Updated: Cleo 3.0 (July 2026) — now fully agentic (multi-step task execution, memory, real-time voice)
- Autopilot feature (2026): Creates a long-term financial roadmap, daily personalized plans, and will execute financial actions automatically
- Architecture: Multi-agent system; background agent monitors transaction history; "roast mode" for spending shame gamification
- SmartSpend comparison: Cleo is the strongest direct AI agentic finance competitor globally. Key differences: Cleo is US/UK only, requires bank account link, no offline mode, no Filipino context, no FHS. SmartSpend's 34 agentic actions are narrower but work fully offline without bank API.

Origin (US)

- Description: All-in-one: budgeting, net worth, investments, credit, tax filing, estate planning, couples visibility
- AI Advisor: Scored 98.3% on CFP® exam (6,000 questions); multi-agent architecture using Claude 4.1 Opus + GPT + Gemini + Perplexity; SEC-registered; 138-check compliance framework
- SmartSpend comparison: Origin is the strongest global AI financial advisor. Not available in Philippines. SmartSpend is not a licensed advisor — it explicitly disclaims this. Origin represents the global frontier that SmartSpend cannot claim to match on advisory depth.

Rocket Money + Rowan (US)

- Rowan: Text/SMS-based AI that scans accounts, negotiates bills, cancels subscriptions, warns about upcoming charges
- SmartSpend comparison: Rowan validates the concept of proactive agentic finance. US bank API required. SmartSpend's detect_subscriptions action is the equivalent approach without SMS.

3.2 Tier 2 — Strong Global AI Competitors

App	Platform	Key AI feature	SmartSpend comparison
Monarch Money	iOS/Android/Web	AI Q&A from own data (2026); receipt scanning; Goals 3.0	Paid $9.99/mo; US bank API required; no offline; no PH context
Quicken Simplifi	iOS/Android/Web	AI Chat with financial data + knowledge + web search	Paid $3.99/mo; US bank API; #1 PCMag 2026
Finanzya	Multi-platform	96% auto-categorization; FIRE/retirement forecast; 31 currencies; private	No PH-specific features; no offline; not free
YNAB	All platforms	Zero-based budgeting; AI category suggestions; transaction export	$14.99/mo; US bank API; no offline; no PH context
Copilot Money	iOS only	AI auto-categorization	iOS-only; paid; US bank API
Empower	iOS/Android/Web	Investment tracking; portfolio analysis; net worth	US bank API; investment-focused

Goodbudget	Android/iOS/Web	Envelope budgeting; household sharing	No AI; manual-entry; available in PH

3.3 Tier 3 — Non-AI Global Comparators (Available in Philippines)

App	Key feature	Why included
Money Manager (Realbyte)	Multi-platform expense tracking; wallets; charts	Widely used in PH; no AI
Monefy	Simple one-tap expense tracking	Ultra-lightweight; offline; no AI
Spendee	Shared wallets; budgets; bank sync optional	Available PH; light AI categorization
Goodbudget	Envelope budgeting; household sharing	Mentioned in Globe PH recommendations
Money Lover	Expense tracking; bills; multi-currency	Popular in Southeast Asia

---

PART 4 — PHILIPPINE & FILIPINO-CONTEXT COMPETITOR ANALYSIS

4.1 Direct Philippine Competitors — Full Matrix

Feature	Smart Spend v2.9.49	Agila v1.2.7	Budget PH	Tarsi	GCash Pera Coach	Alkansya AI	PISO Budget	Sentimo
Platform	Android	Android + iOS	Android/PWA	Android + iOS	Android (GCash)	iOS + Android	Android	Android
Price	Free	Free (cosmetic IAP)	Free	Paid (₱)	Free (GCash req.)	Free	Free	Free
AI chat / agentic	✅ 34 actions	⚠️ Chat logging	⚠️ Insights only	⚠️ NLP entry	✅ Q&A literacy	⚠️ NLP entry + FHS	❌	❌
Voice input	✅	❌	❌	✅	❌	❌	❌	❌
OCR receipt scan	✅	❌	❌	✅	❌	❌	❌	❌
Barcode scanning	✅	❌	❌	❌	❌	❌	❌	❌

Batch screenshots (40+)	✅	❌	❌	❌	❌	❌	❌	❌
Financial Health Score	✅ 0–100 dual-mode	❌	✅ 0–850 budget score	❌	❌	✅ 0–100 (claimed)	❌	❌
Full formula disclosed	✅	❌	❌	❌	❌	❌	❌	❌
Offline mode	✅ Full	✅	✅	✅	❌	❌	✅	❌
Cloud sync	✅ Firebase	✅ Optional	✅	❌	✅ GCash	❌	❌	❌
Taglish / Filipino AI	✅ Full	Unknown	❌	✅ Natural language PH	✅ Multi-language	✅ Filipino context	❌	❌
GCash / Maya tracking	✅ Wallet + import	❌	✅ CSV import	Unknown	✅ GCash balance	❌	❌	❌

SSS/PhilHealth/Pag-IBIG	✅ AI compute + tracker	❌	✅ Records	⚠️ (user requests)	❌	❌	❌	❌
Paluwagan	✅ v2.9.35	❌	✅ Full	❌	❌	❌	❌	❌
15th/30th payday cycle	❌	❌	✅ Core	❌	❌	❌	❌	❌
Gamification	✅ 25 badges + 10 quests	⚠️ Monthly Wrapped	✅ XP/levels	❌	❌	❌	❌	✅ KBoy mascot
Business profile	❌	✅ Full (unique)	❌	❌	❌	❌	❌	❌
Installment / BNPL	✅	✅	✅	❌	❌	❌	❌	❌
Import from other apps	❌	✅ (Money Manager etc.)	❌	❌	❌	❌	❌	❌

App Lock	✅ PIN + biometric	❌	❌	❌	✅ GCash PIN	❌	❌	❌
RA 10173 PII redaction	✅ v2.9.42	Unknown	Unknown	Unknown	Unknown	Unknown	N/A	Unknown

---

4.2 Additional Philippine Apps Found (Sep 21, 2026)

These are smaller or niche apps that round out the Philippine landscape:

App	Focus	Key distinction	Relevance to SmartSpend
Moneygment	Bills payment, SSS/PhilHealth/Pag-IBIG contributions, money transfer	Primarily a payments/contributions tool, not an expense tracker	Low overlap — different core use case
Alkansya AI	AI-assisted Filipino expense tracking with FHS	Has a Financial Health Score (0–100); iOS + Android	⚠️ Direct FHS competitor — only other PH app claiming an FHS
Kitang-kita	Business + personal budgeting, free	Built for Filipino businesses; plans to add personal budgeting	Low overlap currently

KitaFlow	Freelancer-focused; Philippine 8% income tax estimate	Targets BIR simplified income tax for freelancers	Niche overlap on BIR computation
Tarsi	AI/NLP expense entry, voice, OCR receipts, offline, mascot	#1 Paid Finance App in Philippines, March 2026 (App Store)	⚠️ Direct competitor — voice + OCR + offline + NLP similar to SmartSpend
TipidMate	Income, expenses, goals, credit cards, debts, trends	Clean dashboard; no AI	Low threat — basic tracker
Budqo	Envelope budgeting for couples/solo earners	Paper-feel UX; "Escape Plan" debt payoff	Niche (couples); no AI
MoneyGlow	Financial literacy for Filipino digital creators	AI money advice for content creators/freelancers	Niche; advisory only
Finnest PH	Savings tracker with simulated interest growth	Savings-focused; Apple App Store PH	Low overlap
Kaya PH	Group debt splitting and balance tracking	Peer-to-peer debt clarity; not a full PFM	Low overlap

Lista PH	Weekly/monthly/bi-monthly budgets; credit score access	Credit score via partner bureaus	Indirect competitor on credit context
SweldoWise / SweldoTrack	Payday-cycle tracking, MP2 contributions	Niche salary-cycle apps	Payday cycle overlap

---

4.3 Tarsi — New High-Priority Competitor

Tarsi reached #1 Paid App AND #1 Finance App in the Philippines App Store in March 2026 within 48 hours of release. This makes it the most directly comparable Filipino indie app to SmartSpend.

Feature	Tarsi	SmartSpend
Voice input	✅ (NLP: "Starbucks 250")	✅
OCR receipt scan	✅	✅
Offline mode	✅ Full	✅ Full
Financial Health Score	❌	✅ 0–100 dual-mode
Cloud sync	❌	✅ Firebase
Agentic AI (34 actions)	❌ (NLP entry only)	✅
Batch screenshot import	❌	✅ 40+ platforms

Gamification	❌	✅ 25 badges + quests
Free	❌ (paid)	✅ Always free
SSS/PhilHealth/Pag-IBIG	⚠️ user requests	✅ AI compute + tracker
Mascot	✅ Tarsi mascot	❌
iOS support	✅	❌ Android only

Assessment: Tarsi is the strongest Filipino competitor for the voice/OCR/offline use case, but lacks the Financial Health Score, cloud sync, agentic AI depth, gamification, and free pricing that SmartSpend offers. Must be included in the manuscript competitor table.

4.4 Alkansya AI — Second FHS Competitor

Alkansya AI (alkansya.online) explicitly claims to compute a Financial Health Score and provide spending analysis for Filipino users. This makes it the only other Philippine app with a comparable FHS besides BudgetPH.

Feature	Alkansya AI	SmartSpend
FHS / Financial Health Score	✅ Claimed (exact formula not disclosed)	✅ Fully disclosed formula
AI chat for expense entry	✅	✅ 34 agentic actions
Platform	iOS + Android	Android only
Offline	Unknown	✅ Full

Formula transparency	❌ Not disclosed	✅ Fully documented
Dual-mode (full/lightweight)	❌	✅
Free	✅	✅

Assessment: Alkansya AI's undisclosed FHS formula means SmartSpend's fully documented formula is a genuine academic differentiator. This should be highlighted in the manuscript.

4.5 GCash Pera Coach — Critical Distinction

Launched: March 20, 2026. Developed with Microsoft. Philippines' first AI financial coach embedded in an e-wallet.

Aspect	GCash Pera Coach	SmartSpend
Purpose	Financial literacy coaching — teaches concepts	Financial management — tracks and manages behavior
Expense tracking	❌ No tracking	✅ Full tracking
Financial Health Score	❌	✅ 0–100 four-component
Offline capability	❌	✅ Full SQLite local
Agentic actions	❌ Q&A only	✅ 34 actions

Multi-modal input	❌ Text only	✅ Voice, OCR, barcode, batch screenshots
Language support	✅ English + Tagalog + Filipino languages	✅ Taglish/English
Access requirement	GCash Fully Verified account	Any Android device

Panel answer: Pera Coach teaches financial concepts. SmartSpend tracks and manages actual spending behavior. They solve different problems for different user needs — they complement rather than directly compete.

PART 5 — SmartSpend COMPETITIVE POSITIONING

5.1 Where SmartSpend Leads (Defensible, Evidence-Based)

Advantage	Evidence
Only free Taglish agentic AI on Android	34 autonomous actions not found in any reviewed Philippine app; Tarsi and Alkansya have NLP entry only
Only app with batch screenshot import	40+ platforms not found in any reviewed app globally or locally
Dual-mode FHS (full + lightweight)	No equivalent found in any reviewed system — unique design for irregular-income users

Only offline + cloud sync + free	BudgetPH/PISO/Tarsi offline-only; cloud apps require internet
Only fully documented FHS formula	BudgetPH, Alkansya AI, Wingman all do not disclose exact formula
RA 10173 PII redaction before LLM	Mobile numbers and reference numbers stripped before any cloud transmission
Gamification depth	25 badges + 10 daily quests — most found in any reviewed PH app
10 color themes + full UI customization	Not found in any reviewed PH competitor

5.2 Where SmartSpend Has Gaps (Honest Assessment)

Gap	Who has it	Notes
15th/30th payday cycle budgeting	BudgetPH (core feature), PISO, SweldoWise	Planned post-capstone
Business profile (invoices, inventory)	Agila — unique among PH apps	Post-capstone
iOS support	Tarsi, Agila, Alkansya AI, most global apps	Flutter supports iOS; post-capstone
Import from other PFM apps	Agila (Money Manager, Bluecoins)	Post-capstone
Safe-to-Spend number	BudgetPH (core concept)	Post-capstone

Mascot / personality layer	Tarsi (Tarsi mascot), Sentimo (KBoy carabao)	Post-capstone
FIRE / retirement calculator	Finanzya, Origin, Empower	Post-capstone

5.3 Recommended Positioning Statement

"SmartSpend is an offline-first, Philippine-context personal finance prototype evaluated among selected users in La Union. It investigates the integration of Taglish-aware multi-modal input, transparent transaction-derived financial-pattern feedback (FHS), deterministic local financial calculations, and bounded agentic AI assistance — in which proposed data actions are validated by software and confirmed by the user — within a free, zero-subscription mobile application designed for Android."

PART 6 — CLAIMS TO AVOID / REPLACE

❌ Do not claim	✅ Replace with
"First Filipino-English agentic financial app"	"Among publicly reviewed Philippine applications as of September 2026, no equivalent combination of Taglish-aware agentic AI and offline-first financial management was found"
"Only offline financial tracker in PH"	"Among reviewed apps, SmartSpend combines full offline capability with optional cloud sync at no subscription cost"

"No Philippine app has AI money coaching"	"GCash Pera Coach provides AI-assisted financial literacy coaching; Tarsi and Alkansya AI provide NLP-assisted expense entry; SmartSpend addresses the distinct need for offline agentic financial management"
"23 earnable badges"	25 earnable badges
"31 agentic actions"	34 agentic actions
"60 messages/day limit"	150 messages/day across 8 providers
"5 color themes"	10 color themes
"Gemini 3.1 Flash-Lite"	Gemini 3.5 Flash-Lite (migrated Sep 10, 2026)
Any LLaMA model in fallback chain	Retired — return 404 on this account since Feb–Aug 2026
"FHS validated by CFPB scale"	"FHS is a Prototype Observed Financial Health Indicator per CBA-MI (2018) and UNSGSA (2021)"
"100% security / 100% compliance"	"Implements RA 10173 PII redaction and standard mobile security practices; full external audit not conducted"
